

SEALANTS & TAPE

THREAD LOCKER AND PIPE SEALANT

Technical Description:

Anaerobic Thread locker and pipe sealant for sealing of metal threaded fittings. All variants are single component, liquid adhesive that cures hard in the absence of oxygen.

The pipe sealants are available in variants for coarse and fine metal threaded fittings and hydraulic pipes.

Properties – Thread Locker:

Maximum Thread Size: M80
Disassembly strength: High
Temperature range: -50°C to +150°C
Breakaway torque: 32 Nm

Disclaimer:

Make sure to read and adhere to the Mouldpro safety data sheet, and take any necessary precautions required to ensure safe use of the product.

Properties – Pipe sealant (Coarse thread):

Maximum Thread Size: 3"
Disassembly strength: Medium
Temperature range: -50°C to +150°C
Breakaway torque: 11 Nm

Properties – Pipe Sealant (Fine thread and Hydraulic pipes)

Maximum Thread Size: 3/4"
Disassembly strength: Medium
Temperature range: -50°C to +150°C
Breakaway torque: 15 Nm
