

HOSE PROTECTION

SAFE-STRIPS

Safe-strip made of PP with Velcro fasteners

Safe-strip made of PP with Velcro fasteners.
With Eyelet

Safe-strip made of PP with quick-release buckle

Technical Description:

Textile safe-strips can be used and reused to bundle hose lines multiple times. There are 3 different versions available

1. Safe-strip with Velcro fasteners without a mounting eyelet (STD)
2. Safe-strip with Velcro fasteners with a mounting eyelet (STE)
3. Safe-strip with a quick-release buckle (STB).

Disclaimer!

Plastic cables ties should not be used to bundle hydraulic hoses, because they may wear out the hose surface.

Properties:

Type	Material	Strap width (mm)	Operating Temperature	Tensile Strength (N)
STD	Polypropylene (PP)	40	-40°C to +80°C	3200
STE	Polypropylene (PP)	40	-40°C to +80°C	3200
STB	Polypropylene (PP)	40	-40°C to +80°C	5000
