

HOSE PROTECTION

SAFETY SLEEVE

Technical Description:

The MSHA-accepted safety sleeves are a textile hose protector which are produced from recyclable polyester. It is easy to install, and its abrasion resistance is excellent.

In addition to protecting hoses, the safety sleeve protects nearby people in case of a breaking hose, and meets the requirements of standards EN ISO 3457, EN 4413 and EN 12999.

Installation:

Allow tolerance to install over hoses or cable. Both length and co-efficient of friction should be taken into account when determining correct diameter.

Properties:

Material:	Polyester (PES)
Thickness:	0.7 mm ($\pm 5\%$)
Softening point:	250°C
Temperature range:	-50°C to 140°C
Abrasion resistance:	Excellent
Flame resistance:	Excellent
Chemical resistance:	Good
Colour:	Black
