

# DE-SCALING

## NEUTRALIZING POWDER

### Technical Description:

Neutralizing powder used to remove residual activity. Post-descaling treatment in heating and cooling systems.

Also suitable to neutralize used descaling agents, allowing discharge to drain.

### How to use:

Dilute the *Neutralizer* in water at 3-5% solution (300-500 g of the product in 10 liters of water) and let it circulate inside the plant for some minutes. Rinse with water when finished.

When adding the Neutralizer to the water, add it in small quantities, shaking the solution until there is no more effervescence.

It is advisable to check that the pH-value is between 6.8 and 7.5 with a litmus paper.

### Risk Classification:

R 36: Irritating to eyes.

### Warnings

S 2: Keep out of the reach of children

S 22: Do not inhale the dust

S 26: In case of contact with eyes, immediately wash with plenty of water and ask for a doctor.

**Xi Irritant**
